Date: 13 April 2006

To whom it may concern,

British American Tobacco had project in their cigarette factory in Vranje, Serbia & Montenegro.

This included refurbishment of existing building and construction of new facilities. All these works have been carried out while the factory was in full production and in parallel was extended to increase.

The Company Credo has carried out all electrical works, high voltage, low voltage and extra low voltage. This included:

- 4 HV transformer stations with associated LV switch-rooms
- Replacement of all existing LV system as well as extending into new buildings.
- All electrical connection to new existing mechanical installation and Clients equipment.
- New fire detection system and other ELV systems.

Credo has shown understanding for the Client needs and carried out the works with great workmanship and leadership.

The company Credo has carried out these works to the full satisfaction of the client and the personal effort of the management to complete the works has contributed to the successful completion of the project.

We can recommend Credo as a professional and serious company with the right mentality to make a project successful.

Regards,

Mark Knox
Project Director
British American Tobacco
